

Thakur Rohan Singh

Hyderabad | Ph: +91 8463920923 | rohanthakur2332@gmail.com [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Summary

Application-focused Associate Analyst with experience in backend development, data processing, and enterprise systems. Skilled in Java, Python, and SQL, with hands-on experience in building automation workflows, REST APIs, and data validation systems. Strong understanding of SDLC, OOP principles, and system integration. Passionate about developing scalable enterprise applications using modern frameworks and tools.

Experience

Associate Analyst | **Tech Mahindra – Hyderabad, India** | July 2025 – Present |

Client: Parker Hannifin Corporation

- Developed Python-based automation scripts to validate and process large-scale enterprise datasets, improving efficiency and reducing manual effort
- Designed and implemented data validation pipelines to ensure accuracy and integrity before downstream processing
- Worked with EDI transactions and Order Management Systems (OMS) to process and reconcile enterprise data

Technical Skills

Programming: Java (Core, OOP), Python, JavaScript

Frameworks & Backend: Spring Boot (Basics), REST APIs, JSON, Postman

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Jira, Salesforce

Integration & Systems: IBM Sterling B2B Integrator, EDI Workflows, OMS

Data & Analytics: SQL, Power BI, Advanced Excel

Cloud: Oracle Cloud Infrastructure (OCI)

Projects

Expense Mastermind – Smart Expense Tracking & Insights Platform | [Live Demo](#)

- Developed a full-stack expense tracking app using React, TypeScript, Node.js, and Express.
- Implemented secure session-based authentication and RESTful APIs for user and transaction management.

- Designed a responsive UI and integrated PostgreSQL for efficient and structured data storage.
- Built an interactive dashboard to visualise spending patterns and category-wise insights.
- Enabled users to analyse expenses and make better financial decisions through actionable insights.

Smart Inbound Order Automation (Non-EDI PO → SO)

- Designed and implemented a data processing pipeline for automating inbound order workflows
- Built modular components for OCR-based extraction, data transformation, and validation
- Implemented structured exception handling and audit logging mechanisms
- Reduced manual processing effort by 60–70% and improved turnaround time
- **Technologies:** Automation Workflow Design, Data Validation Pipelines

Physical Therapy Exercise Classifier |

- Developed a machine learning model to classify physical therapy exercises using sensor data
- Processed accelerometer, gyroscope, and magnetometer datasets
- Performed feature engineering, including statistical and motion-based metrics
- Implemented classification models using SVM and AdaBoost algorithms
- Achieved high accuracy in identifying exercise patterns

Education

B.Tech – Computer Science Engineering (Data Science)

Vaagdevi College of Engineering – Warangal

2021 – 2025

GPA: 7.15

Intermediate (PCM)

Aditya Junior College – Adilabad

2019 – 2021

SSC

Gowtham Model School – Adilabad

2018 – 2019

Certifications

- Oracle Cloud Infrastructure 2025 – AI Foundations Associate
- Oracle Cloud Infrastructure 2025 – Foundations Associate
- Alteryx Designer Core Certification
- Alteryx Foundation Certification

- Advanced Excel for Data Analysis – Udemy
