Professional Summary

Data Analyst with 1+ year of experience in enterprise data analysis, supply chain analytics, business intelligence, reporting, and workflow automation. Skilled in SQL, Python, Excel, Power BI, data cleaning, data transformation, KPI tracking, and dashboard development. Experienced in translating operational data into actionable insights, improving reporting accuracy, and supporting data-driven business decisions.

Experience

Associate Analyst | Tech Mahindra – Hyderabad, India | July 2025 – July 2026 |

Client: Parker Hannifin Corporation

- Analyse enterprise supply chain and order management data to support business operations and reporting accuracy.
- Perform data extraction, cleaning, preprocessing, validation, and transformation using SQL, Python, and Excel.
- Develop interactive Power BI dashboards and KPI reports to communicate operational performance and business insights.
- Collaborate with stakeholders and use Salesforce, IBM Sterling B2B Integrator, Jira, and Excel to support order processing and workflow tracking.

Key Skills

SQL & Data Analysis: SQL, Data Extraction, Data Cleaning, Data Validation, Data Transformation, Exploratory Data Analysis (EDA).

Programming: Python, Pandas, NumPy, Matplotlib

Business Intelligence: Power BI, DAX, Power Query, KPI Reporting, Dashboard Development, Data Visualization.

Spreadsheets: Advanced Excel, Pivot Tables, Data Analysis, Reporting

Projects

Smart Inbound Order Automation (Non-EDI PO → SO)

- Designed and implemented a data processing pipeline to automate inbound order workflows from Non-EDI Purchase Orders to Sales Orders.
- Developed modular components for OCR-based data extraction, transformation, and validation.
- Implemented validation rules to identify incomplete, inconsistent, and invalid order information.

- Developed structured exception-handling mechanisms for identifying and managing processing issues.
- **Used Technologies:** Python, SQL, Data Processing, Data Transformation, Data Validation, Process Automation.

Physical Therapy Exercise Classifier |

- Developed a machine learning model to classify physical therapy exercises using sensor data.
- Processed accelerometer, gyroscope, and magnetometer datasets for analysis.
- Performed feature engineering, including statistical and motion-based metrics
- Implemented classification models using SVM and AdaBoost algorithms
- Achieved high accuracy in identifying exercise patterns.

Technologies: Python, Data Analysis, Feature Engineering, Machine Learning, SVM, AdaBoost.

Education

B.Tech – Computer Science Engineering (Data Science)

Vaagdevi College of Engineering – Warangal

2021 – 2025

GPA: 7.15

Intermediate (PCM)

Aditya Junior College – Adilabad

2019 – 2021

SSC

Gowtham Model School – Adilabad

2018 – 2019

Certifications

• Oracle Cloud Infrastructure 2025 – AI Foundations Associate

• Oracle Cloud Infrastructure 2025 – Foundations Associate

• Alteryx Designer Core Certification

• Alteryx Foundation Certification

• Advanced Excel for Data Analysis – Udemy
